# JAVA Introduction

Let's Write a simple Java Program
Open a notepad and write below mentioned code:

```
class HelloWorld{
public static void main(String args[]){
System.out.println("Hello World");
}
}
```

Save the file with .java Extension. Then file name must be same is Class Name like HelloWorld.java

javac command is used to compile the java file into its byte code.
java command is used to run Byte code
